To whom it may concern

Re: Rubtzov Arteum 880070511

This 10 years old boy has been diagnosed with Osteosarcoma of the Tibia and has been under my treatment. He has completed his neoadjuvant chemotherapy and was operated on 15/06/14 on biopsy the necrosis was disappointing -55%/

Therefore he will continue treatment according to the long arm of the protocol MAPIE. His treatment is expected to last for about 6 more months. All chemotherapy treatments will require hospitalizations.
